

**Celebrating
30 years!**

Help us celebrate by reaching
our goal of diverting
one billion pounds
of household
items and building
supplies from
landfills by 2022.

Did you know?

Over
80%

of Canadians are likely to recycle
items like cans, cardboard or paper.

But...

less than half recycle their old
household furniture, despite
having accessible options like
Habitat ReStore?

How can you help?

It's simple! **Shop or donate to
Habitat ReStore today.**

Over the past 30 years, Habitat ReStores have helped divert

**950 million
pounds***

of household furniture and
building supplies out of landfills.

*That's 430,000 tonnes, which is almost 3.4 million couches saved!

... and if we're counting
couches, that's only

178,000** to go!

**50 million pounds
or almost 25,000 tonnes, based on an average 3-seater couch.

For 30 years, the Habitat ReStore has been helping families in need of affordable housing across
Canada by selling new or gently used home furnishings, appliances and other renovation materials.

Find your local Habitat ReStore and learn more at **habitat.ca/ReStore**.
